Presentations 3rd Annex 44 Forum, Tsukuba, Japan, September 19-21, 2005

Fernando Marques da Silva, LNEC, Portugal.
Active facades SOTAR (tentative)

Marco Perino, Politecnico di Torino, Italy
Synthetic indices for assessing performances of ventilated facade.

Shigeki Nishizawa, Building Research Institute, Japan
Experiment of the mixing property and the heat exhaust effect under cross ventilation in a full-scale building model

Masaki Tajima and Takao Sawachi, National Institute for Land and Infrastructure Management, Japan, Yuji Hori and Yasuo Takahashi, Building Research Institute, Japan
Energy Conservation Effect of Hybrid Ventilation System Using Self-Regulating Openings for Multi-Family Buildings

Per Heiselberg, Aalborg University, Denmark
Uncertainty in modelling of building performance

Ad van der Aa, Cauberg-Huygen Consulting Engineers, The Netherlands
The Trias Energetica as a design approach

Ad van der Aa, Cauberg-Huygen Consulting Engineers, The Netherlands
Europol Headquarters The Hague

Yuichiro Kodama, Kobe Design University
Building Envelope Design Today in Japan.
